

Motor Yacht Solandge Leads Awards at 2014 Monaco Yacht Show

***Awarded 'Best Exterior' in first ever Monaco Yacht Show Awards and
"La Belle Classe Superyachts" from Yacht Club de Monaco***

25th September 2014

Monte Carlo, Monaco – Delivered in October 2013 by Lürssen with a length of 85 metres, Solandge has quickly become one of the world's most iconic super yachts on the global charter market. This week at the 2014 Monaco Yacht Show, Solandge has been presented with two of the industry's most prestigious yachting awards.

Under the High Patronage of HSH Prince Albert II of Monaco, Solandge was awarded 'Best Exterior' in the first-ever Monaco Yacht Show Awards. The 24th edition of the MYS saw more than 180 yachts on display including 40 new builds. Designed by Espen Øino International, Solandge is a stunning and complementary mix of gracious soft shapes and aggressive hard lines and knuckles.

Commenting on the award, Espen Øino said: "This being the first award for this event and the new Monaco Yacht Club, it's fantastic. Especially as this is our home city. Our entire team is extremely proud of Solandge."

Solandge was also bestowed with the prestigious 2014 "La Belle Classe Superyachts" Award from the Yacht Club de Monaco. Respect for etiquette at sea, safeguarding the environment, honouring a sailing heritage and promoting the very latest technologies are the values that lie at the heart of the Club's "La Belle Classe" label, through which the YCM unites owners and all those involved in yachting.

Richard Masters, Founder and Managing Director of Master Yachts which oversaw Solandge's build and accepted the award on her behalf, commented: "Solandge was built as a labour of love and she's an exemplary testament to La Belle Classe Tradition. Her concept, design and engineering are at the forefront of innovation for a vessel of her class. On behalf of the owners, I am honoured to accept this award."

Uniquely different from other super yachts, Solandge offers an experience similar to that of visiting a friend's personal home. Built as a family yacht for pleasure on extended voyages throughout the Caribbean and Mediterranean, Solandge was lovingly crafted to provide a home-away-from-home for clients and their families and friends. Her generosity is felt

throughout – from her extraordinary volumes and unique mix of rare and striking materials to her exceptionally warm and attentive crew led by Captain Brett Fillis.

Notes to Editors:

About Solandge:

Delivered in October 2013 by the renowned shipyard Lürssen with a length of 85.10 metres and a beam of 13.80 metres, Solandge is one of the world's most iconic new super yachts available on the global charter market. Designed by Espen Øino with interior design by Aileen Rodriguez, she offers six extraordinary decks designed as a home-away-from-home on the high seas. Managed by Master Yachts, Solandge recently completed her first cruising seasons in 2013/2014 in the Caribbean and Mediterranean.

About Master Yachts:

Master Yachts is a super yacht management company, dedicated to providing a bespoke, diligent and exceptionally reliable service for both sail and power. Each member of the company's team holds a high level of industry knowledge and expertise, handling requirements with the utmost professionalism and integrity, cementing the brand as a prominent leader in the yacht management sector within the super yacht industry.

About Lürssen:

The German yacht-builder Lürssen has earned an international reputation as the No. 1 specialist in exclusive, custom-built yachts. For five generations and since 1875, Lürssen has been cultivating the most refined skills and advanced technologies to create truly outstanding vessels. And because the company's connection to ship-building is as deep-rooted and individual as only family bonds can be, the Lürssen commitment is deep and its approach individual. The company with its head office in Bremen operates seven separate locations in Northern Germany, each specializing in a specific size of yacht – from 60 metres to well over 200 metres in length. Each is equipped with the most advanced shipbuilding technology available and staffed by highly qualified and dedicated naval architects, specialized engineers and technicians.
